Company Announcement

19 Dec. 08

Dear Sir

On behalf of the Board of Directors of DWS Advanced Business Solutions Ltd (DWS), I am pleased to announce that DWS has won a tender to provide services to the Victorian Government's Department of Transport (DOT) to build and maintain its Performance Reporting System (PRS). PRS is part of the Metrol Replacement Project, a DOT initiative to upgrade the real-time systems used for train control and monitoring of the Melbourne metropolitan train network. The project commenced in December 2008 and is valued at \$5.3M, with Provisional Acceptance to be complete by February 2010.

This tender win comes on the back of DWS also winning a number of other smaller projects with various State and Federal Government agencies, thereby strengthening DWS' already strong presence in the Government Sector. These wins also confirm DWS' capability to successfully bid for (and win) projects of significant value. The current DWS tender pipeline is strong with some \$50M of tenders submitted but not yet won.

All DWS regions are performing as budgeted in the current year with the exception of Sydney (as previously disclosed). Having restructured the Sydney business in October and November, we expect it will return to trading at normal margins during the second half of FY2009.

Yours faithfully

Danny Wallis
CEO / Managing Director
